

Professional Grade Area & Pathlights

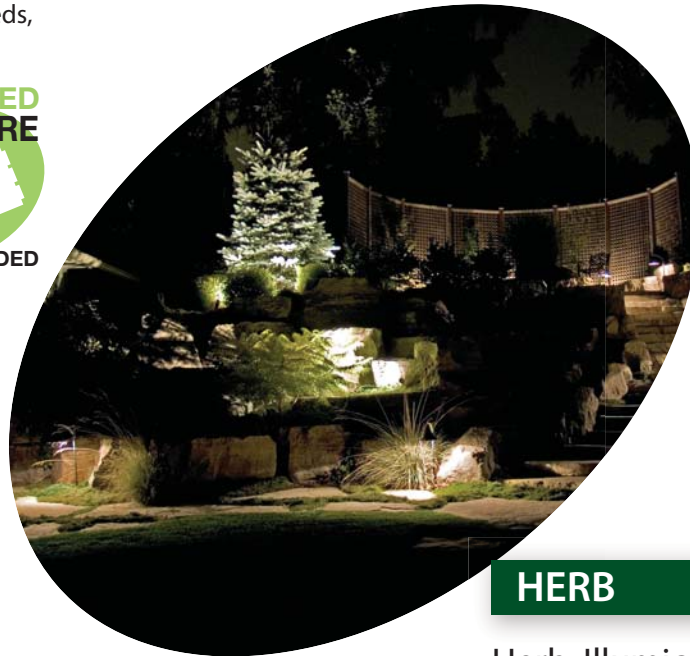

ASPEN

Aspen, our elegant wide-brimmed area light, offers glare-free path and walkway illumination.

Constructed of solid machined brass, Aspen is ideal for low-level lighting along front drives, walkways, borders, and entranceways, leading guests safely through your landscape design.

To protect the lamp and socket from water, moisture and debris, Aspen's elegant brass construction includes a shock-proof frosted polycarbonate lens.

Aspen produces low-level, evenly dispersed, circular patterns, which could also be used to enhance decorative accents in tiered plant beds, hardscapes or walkways.

HERB

Herb, Illumicare's adjustable brass path and area light, adds safety and functionality to any outdoor living space.

With an adjustable lamp base, Herb offers a wide area light to help accent walkways, plant beds, path borders and even stairs. His frosted polycarbonate lens protects the lamp and socket from water, moisture and debris.

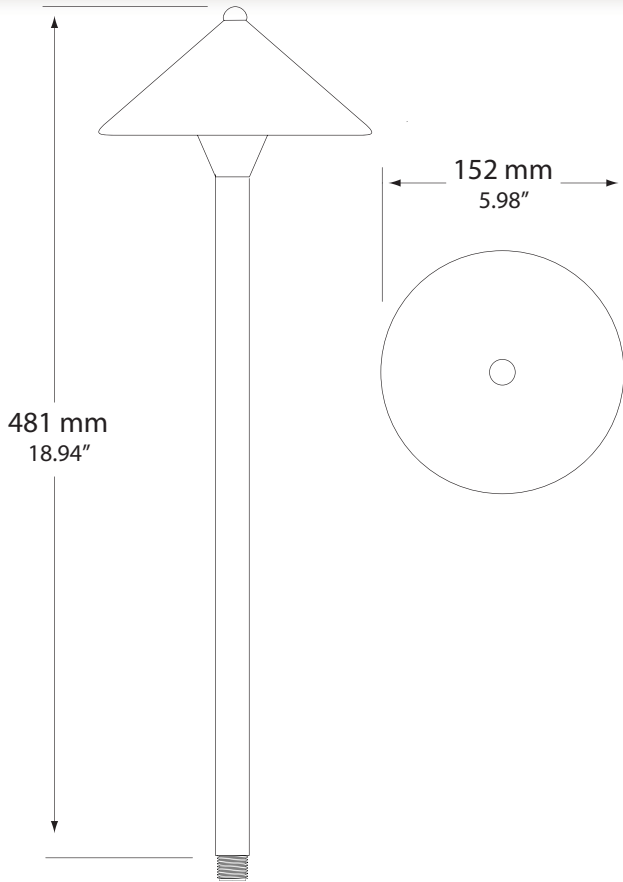

By allowing for numerous beam spreads, Herb's adjustable settings give maximum design flexibility when choosing the perfect area and path light to grow with your design.

Herb is especially helpful in lighting changes in elevation, such as steps and deck edges, as well as highlighting plant beds, shrubs and flowering plants.

Professional Grade Area & Pathlights
